

Managed Backup as a Service, Powered by Asigra

Ultra-secure Backup & Recovery for SMB, Enterprises & Sensitive Data

Small and mid-size enterprises handling critical data have their work cut out for them. Whether you're a bank or law firm, government contractor or medical provider, sensitive information and servers must be protected, uptime ensured and compliance demands met. CyberFortress Backup as a Service, Powered by Asigra, removes all the complexity, while providing ultra-secure data protection that eliminates malware before it infects your backups.

Managed

Completely managed by CyberFortress' experts from deployment and backup scheduling to rapid recovery.

Advanced Security

Protections include backup scanning and quarantine, along with deep multi-factor authentication (MFA).

Comprehensive

Protects an entire business with one solution. Supports all major operating systems, servers, databases (DBs) and hypervisors.

Continuous & Instant

Automatically backs up in near real-time, recovery to any point in time. Reduces downtime by restoring to secondary systems in minutes.

Fast

Agentless design can be rapidly deployed to thousands of endpoints. With a data collector at the LAN level, users can be up and running in as little as one hour.

Personal Support

Access to a live human being for quick problem resolution, 24x7.

Three Simple Steps to Success

1

Select
CyberFortress as your
Service Provider

2

Deploy
Asigra Software

3

Send
Your Data to
CyberFortress

Credentialed Recovery Professionals

Microsoft Certified System Engineer, Microsoft Certified System Administrator, Microsoft Certified Solutions Associate, Microsoft Certified Technology Specialist, Microsoft Certified Professional, VMware vExperts, VMware Certified Associate-Data Virtualization

Managed Backup as a Service, Powered by Asigra

CyberFortress Delivers the Advanced Security and Compliance that Sensitive Data Requires

- **Scanning & Quarantine:** AI-powered scanning with ransomware checks health of backups, scans during restore again to catch and quarantine dormant ransomware so production isn't reinfected
- **Soft Delete:** Holds deleted data for a designated period, fooling attackers into thinking permanent deletion has occurred, while still enabling users to retrieve assets
- **Variable File Naming:** Can rename file repositories in non-standard formats to prevent backup recognition and deletion by viruses
- **Immutable Retention:** Unifies immutable retention and application credential protection to stop unauthorized sources from modifying and deleting backup data in storage
- **End-to-end Security:** AES 256-bit encryption for data in-flight and at-rest
- **Compliant & Customizable:** Ensures compliance with all significant regulations. Targeted file-level restores and customizable reporting helps meet audits

Enforced By The Recovery People

CyberFortress' greatest strength is its people. From mobile to mainframe, our comprehensive services are enforced by highly-trained experts and access to a real human for support, 24x7.
